Security Measure Policy

SRI TRANG AGRO-INDUSTRY
PUBLIC COMPANY LIMITED

Security Measure Policy

Companies under the group of Sri Trang Agro-Industry Plc have a strong commitment to develop the security system of international shipping to cope with the standardization framework of World Customs Organization (WCO)'s security system. It realizes more restriction on security by starting from the origin of the product till the supply chain of its shipping, which is important in operating business. The company has a strong commitment in promoting the safety among employees and other stakeholders, as well as putting a continuous effort to detect, remove and control insecurity, which may be relevant to the company's business operation. Then, the company launches security measures for all of us to follow, as follows:

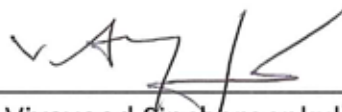

1. In and Out of the Building Security Measure
To check the safety of the building, as well as controlling in and out of people and vehicles rigidly.
2. Security Measure to be Associated with Employees
To check the background before being employed and also updating their data in order to make sure that they are qualified to fit the work.
3. Business Partner Security Measure
To select them by interviewing and checking their information from recognized sources in order to ensure that they have a good background to operate business with, and also having a written agreement with them is a must.
4. Security Measure to be Associated with Products
To have a report on the control of in and out of products and storing products at the safe place, with signing a signature after delivery in each point, as well as having a document after receiving products, which can be checked and tracked.
5. Security Measure on Vehicles to Ship Products
To keep vehicles, preferably used in shipping products, stay in good condition regularly for work. Staff in charge will have skills in managing security for products, and vehicles can be monitored and tracked.
6. Security Measure on Information and IT System
To have methods of keeping its information security and carefully have its preventive system of electronic information.
7. Security Measure on Checking System and Investigating Incidents to be Emerged
To have regulations on investigating, analyzing and reporting incidents in order to seek preventive and solving-problem measures.

8. Security Measure on Crisis Management and Solutions

To train workers and practice its emergency plan continuously in order to review it and seek solution when crisis emerges.

Following the security measures is a duty, which all staff will have to pursue the regulations given by their heads rigidly, with a focus on operational participation so that the security of product movement in the supply chain system has kept ongoing and forever.

Announces on November 11, 2016.
